I. INTRODUCTION

In keeping with our vision to be a modernized customs and tax administration delivering excellence in revenue collection, border protection, and trade facilitation, the Customs and Tax administration is pleased to share with all the importers the ASYCUDA World Customs Declaration User's Guide. The manual is intended to guide the system users in preparing and submitting the electronic cargo declaration. This manual is intended to complement the hands-on training provided by the ASYCUDAWorld National Project Team to ensure that people who interact with the system are both knowledgeable and comfortable.

The declaration processing is the core component of any Customs clearance process. Declarations are the base document of the Customs Administrations, provide data to control the movement of goods into and out of the country, and are the main source of national trade statistics.

In ASYCUDAWorld, the input and assessment of declarations is done by the importer or their representatives. The Customs Officers on the other hand do the control portion of the customs declaration process.

Only registered users can use ASYCUDAWorld. To gain access to the system, a user will apply using the user registration form developed for this regard.

WELCOME TO ASYCUDAWorld!

II. GENERAL INFORMATION

1. How to access the module

The access to ASYCUDA World is granted through an application process. All users must submit the user application and registration form to the Customs and Tax Administration to get access.

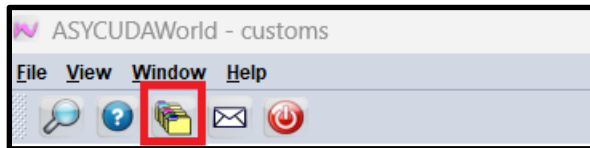

The Customs and Tax Administration will issue a login name and initial password. The appropriate access rights will be granted based on the profile of the applicant. To access the Goods clearance module, the user must have the relevant rights.

2. Open the main menu

When the user is logged into ASYCUDAWorld, the main menu is accessed by clicking on the

button.

Then the main menu opens. The available modules depend on the access level granted to the user's profile.

3. Declaration fields

Here is a list of the declaration data fields and the respective description.

Nr	Data field	Description
A	Customs clearance office	A customs office at which a declaration is lodged.
	Registration number	It is assigned automatically by the system when a declaration is validated. It is made up of a serial letter and sequence number (e.g. C 427)
	Registration date	Represents the date the declaration is registered in the system
	Manifest	It represents the reference number of the cargo manifest, which contains the goods being declared. It is made up of the manifest reference and the manifest reference number the two separated by a space (e.g. 2024 12)
1	Declaration	Type of declaration code according to the standard (EX1, EX2, IM4, SD4 etc...).
2	Exporter Code	The business code of the entity that last held ownership of the goods prior to the importation or exportation. This field is not used when submitting an import declaration.
	Exporter Name and Address	The name of the entity that last held ownership of the goods prior to the importation or exportation. This field is not mandatory when submitting an import declaration.
3	Number of the forms	This is automatic information. It is the sequential number of the current form.
	Total number of forms	This is automatic information. It is the total number of fields.
4	Load List	The number of loading lists, manifests, or similar documents.
5	Items	The total number of the declared items.
6	No. packages	Total number of packages for the whole declaration.
7	Reference number	Unique reference number of a declaration provided by the trader.
8	Consignee - code	The person who has possession of the goods or to whom the goods are consigned. Here, we provide the TIN / Business ID number.
	Consignee - name	The name or description of the person or business who has possession of the goods or to whom the goods are consigned. Here, we provide the system will automatically fill the name and address.
9	Financial	Name and address of the party responsible for the payment of the duties paid on the declaration. This field will be used when that person / business is different from the consignee.
10	County last con	Country from which goods have been or will be consigned prior to final importation
11	Trading cty	Country in which the financial transaction / purchase was finalized.
12	Value details	Additional cost items as provided on the valuation note

13	C.A.P	Common Agricultural Policy. This field is not used in the FSM.
14	Declarant - Code	Business ID or TIN of the entity in charge of the clearance. This can be the Customs clearing agent (broker) code or the trader business ID.
	Declarant - Name	Name / description of the entity responsible for the clearance.
15	Country of export	Country from which goods are despatched for the purpose of export.
16	Country of origin	Country in which the goods have been produced or manufactured. It is the country of origin of the goods and reflects the code entered at the item level in Box 34. When more than one country of origin is declared, the word "Many" will be displayed in the field.
17	C.D. Country of destination	The country to which a consignment is to be delivered to the final consignee. For import declarations, the country of destination will always be FSM.
18	Identity and nationality of active means of transport at departure	Means of transport used from the border office to the destination. (Departure for export, arrival for import)
19	Ctr	An indication whether goods are transported in a container or not. Ticking this box will cause a container list to be opened.
20	Delivery terms - Code	The field describes the particulars of the terms of the commercial contract (terms of delivery) between the buyer and seller of the goods consigned. The code is the international standard INCOTERMS code
	Delivery terms - Place	It is the place to where the INCOTERMS are relevant
21	Identity and Nationality of active means of transport Crossing the border	Free form description of a type of means of transport arriving at and crossing the border
22	Currency - code	The code for the currency in which the commercial invoice is presented.
	Total amount invoiced	Describes the invoiced price for all goods declared. The Amount represents the sum of the all item prices declared in the currency invoiced
23	Exch. Rate	The exchange rate in force between the invoiced currency and the US Dollar The appropriate exchange rate is automatically inserted by the system after selecting the currency code.
24	Nature of transact	Not used in the FSM
24	Nature of transact	Not used in the FSM
25	Mode transport at the border	Code specifying a type of means of transport at border
26	Inland mode transport	Code specifying a type of means of transport for in-country transportation. This field is not used in the FSM

27	Place of discharge	Name of a seaport, airport, freight terminal, rail station or other place at which goods are loaded onto the means of transport being used for their carriage.
28	Financial and banking data	Not used in the FSM
29	Office of entry	Customs office at which the goods enter the customs territory of destination.
30	Location of goods	Name of the place where a specific goods item is located and eventual location in which physical inspection might take place.
31	Marks and Numbers of package1	Marks provided by the supplier on the package 1 st part
	Marks and Numbers of package2	Marks provided by the supplier on the package 2 nd part
	Number of packages	It is the number of packages for the item being declared.
	Kind of packages - code	The code used to describe the shape or configuration of a package.
	Kind of packages - name	Description of the package code
	Container number	Reference of the container if the goods are in a container
	Description of goods	The commercial description of the goods
32	Item No.	This box is automatically completed by the computer system; it identifies the item number currently being completed
33	Commodity code	Code (Harmonized system) specifying a type of goods for Customs, transport, or statistical purposes (generic term).
34	Cty. Orig. Code	A code to identify the country in which the goods have been produced or manufactured, according to criteria laid down for the application of the Customs tariff or quantitative restrictions, or any measure related to trade.
35	Gross mass	Weight (mass) of goods including packaging but excluding the carrier's equipment.
36	Prefer. Code	Code specifying a regime according to which tax is assessed such as preferential duty rate. This field is not used in the FSM
37	Procedure - Extended customs procedure code	This field comprises four-digits and identifies the Customs Procedure Code (CPC); whereby the first two-digits represent the procedure being requested, followed by a second two-digit representing the previous procedure (if any).
	Procedure - National customs procedure code	This field represents the Additional National Codes (ANC). It is a three-digit alpha numeric codes that identify if the goods subject to special duty/tax treatment
38	Net mass	Weight (mass) of goods without any packaging.
39	Quota	Field not used in the FSM
40	Summary	Identifies the bill of lading or airway bill number required to identify the consignment of goods.

		In certain CPCs the box is used to refer to a previous document (e.g. temporary importation or exportation, etc.)
41	Supplementary	Quantity of the goods in the unit as required by Customs for tariff, statistical or fiscal purposes
42	Item price	Amount due for each chargeable item of goods or services before other costs are added (unless invoice is quoted CIF).
43	Valuation method code	Method used to value the declared item.
44	Additional information	Identifier of a document providing additional information.
45	Adjustment	Monetary Amount Adjustment Indicator.
46	Statistical value	Result of the Customs value as multiplied by the adjustment indicator. The Statistical value is used in the tax rules as the tax base.
47	Calculation of taxes	The various duties / taxes /fees due on each item of the consignment are calculated through the tax rules of the system and the results are displayed in this box. The taxation rules determine what is displayed in terms of tax type; tax base; tax rate, the tax amount that is calculated and the mode of payment. Eight taxes can be displayed on one declaration.
48	Deferred payment	This box is used for the account number if payment is made using a credit or pre-payment account. If not completed, the declaration will be cash paid.
49	Identification of warehouse	To identify a warehouse where a particular consignment has been stored.
	Warehouse time delay	It is the duration in days of the period under which the goods will remain in any suspense regime. This field will be available for warehousing, temporary imports, temporary exports and any other suspense regime
B	Accounting Details	This box shows the mode of payment, the assessment number and receipt number when a declaration has been paid, as well as the processing dates. It includes any global fees calculated, and the sum of all amounts to be paid in full.
50	Principal	This field is not used in the FSM.
51	Intended office of transit	This field is not used in the FSM.
52	Guarantee not valid for	This field is not used in the FSM.
53	Office of destination and	This field is not used in the FSM.
54	Place and date	To be filled by the representative of the trader indicating the date of the declaration and the name of the representative.

III. DECLARATION PROCESSING

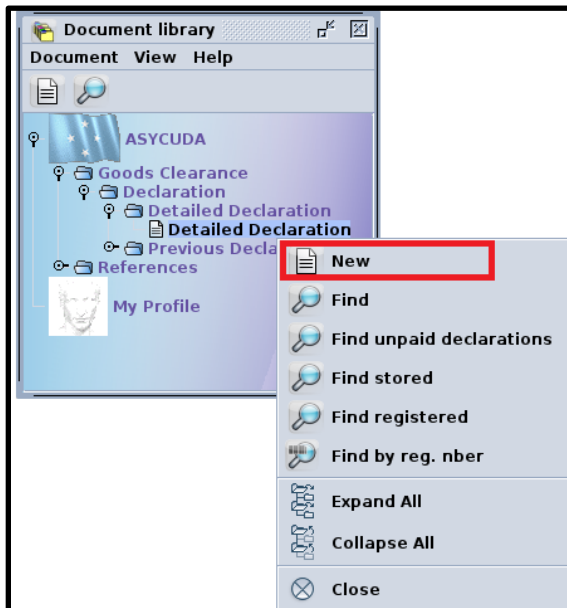

1. Access the goods clearance module

Access the Detailed declaration e-document by navigating the Document Library using the Path: ASYCUDA -> Goods clearance -> Declaration -> Detailed declaration -> Detailed declaration.

2. Open a new declaration

To create a new declaration, right click on “Detailed Declaration” menu and select “New” option.

The Detailed Declaration e-document will open. It is composed of one main form (S.A.D) and other subsequent form. Some forms will be available depending on the information captured on the main form. Otherwise, they will be hidden.

a. Completing the S.A.D form (Main form)

The SAD main form consists of two (2) segments:

- the general segment,
- and the item segment.

The general segment covers the general information about the entire consignment, while the item segment contains all the necessary specific information required to clear the consignment. Once you click the “New” operation, the declaration form will appear:

1. The General information part

The Assessment Notice Page outlines the details and totals of all the applicable duties, taxes and fees associated with the declaration. These details are displayed in total as the assessed amount to be paid. All updates to the declaration that impacts the duties, taxes and fees payable which may arise during the clearance process are captured on this page. These updates may include additional amounts to be paid or refunded.

d. Completing the info page form

This is a free text page that allows the declarant to record additional information that may not be captured on the other tabs of the declaration. This page also allows the importers to provide clarity, note additional comments or responses that may be required for the processing of the declaration.

Add a new scanned document

To add a new scanned document, click on the  icon and select the file to upload. Then select the type of scanned document in the code dropdown list.

Click on the  icon to upload the file.

If more than one item is to be uploaded, repeat the same process until all the files are uploaded.

f. Completing the container from

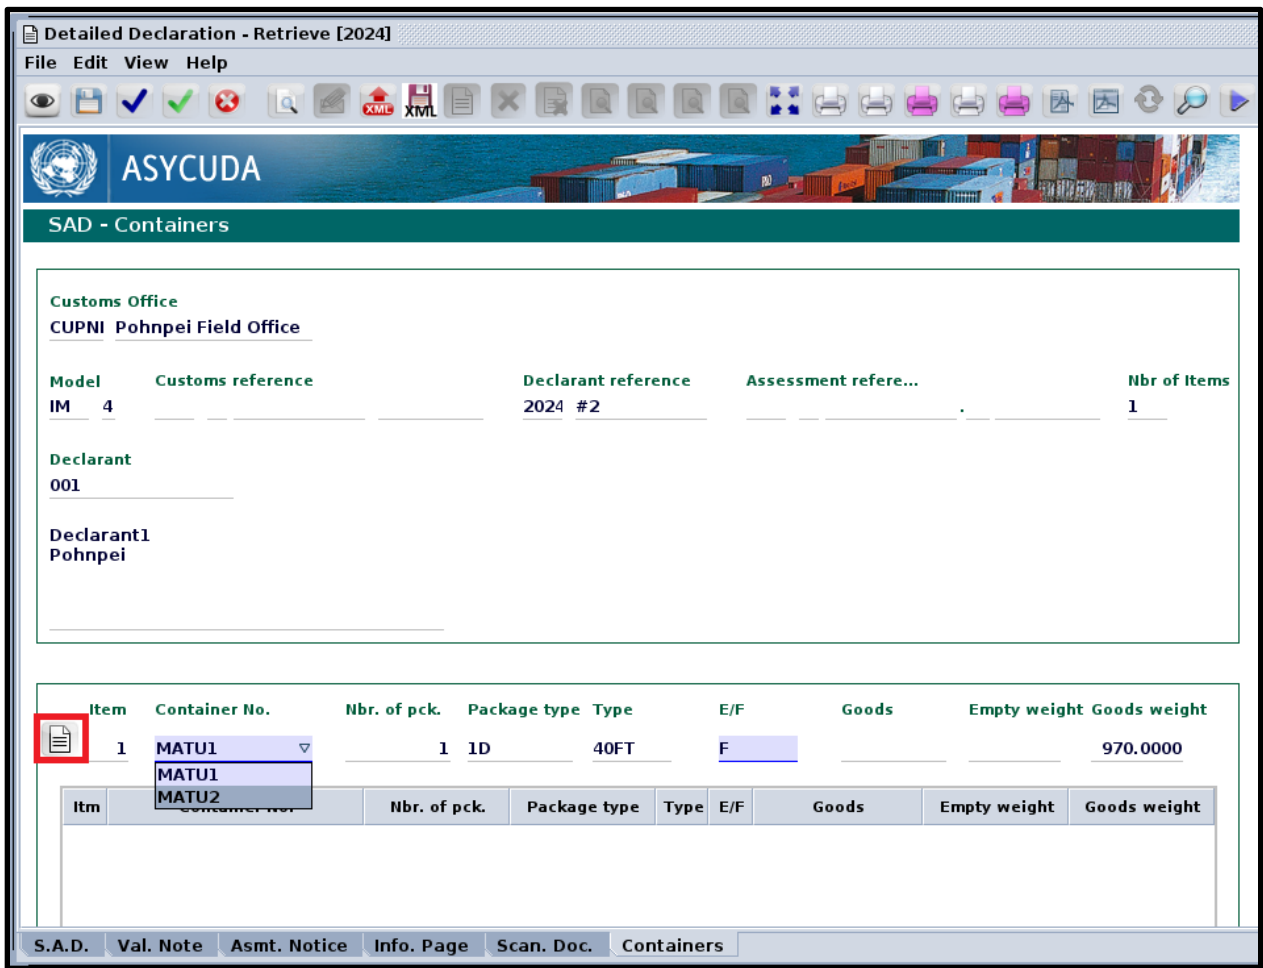

This page is optional and is only required for containerized declarations. The container page is triggered by the selection of Box 19 on the Declaration S.A.D page. The Container Page is used to capture all associating containers linked to the commodities being declared from a particular waybill/shipment. It is essential that during the preparation of the declaration all the commodity item lines are completed prior to completing the container page. This will allow the system to fill all the relevant details required on this page. After this page is completed the system conducts a validation between the details on the container page and the S.A.D declaration to ensure consistency prior to submission.

Add a container

To use the container tab, tick the box 19 on the S.A.D form. Then the Containers tab will be available.

Then click on the “Containers” tab to capture the containers linked to the commodities on the declaration.

Fill out the container information and click  icon to add the container information.

Item	Container No.	Nbr. of pck.	Package type	Type	E/F	Goods	Empty weight	Goods weight
1	MATU1	1	1D	40FT	F			970.0000

Repeat the same process to add the container information for all the item lines.

g. Completing the previous document form

This page is triggered by a declarant identifying in his declaration that there is a previous procedure that related to the operation being carried out. This is triggered by the procedure indicated in Box 37 of the declaration. The S.A.D Page must be completed prior to completing the Previous Document Tab. The Declarant is then required to enter the details of the registered declaration that is being referenced.

If the selected procedure requires the completion of a previous document, the “Previous document” tab will be triggered.

Fill out the information on the previous declaration and the information on the current declaration.

4. Find a declaration

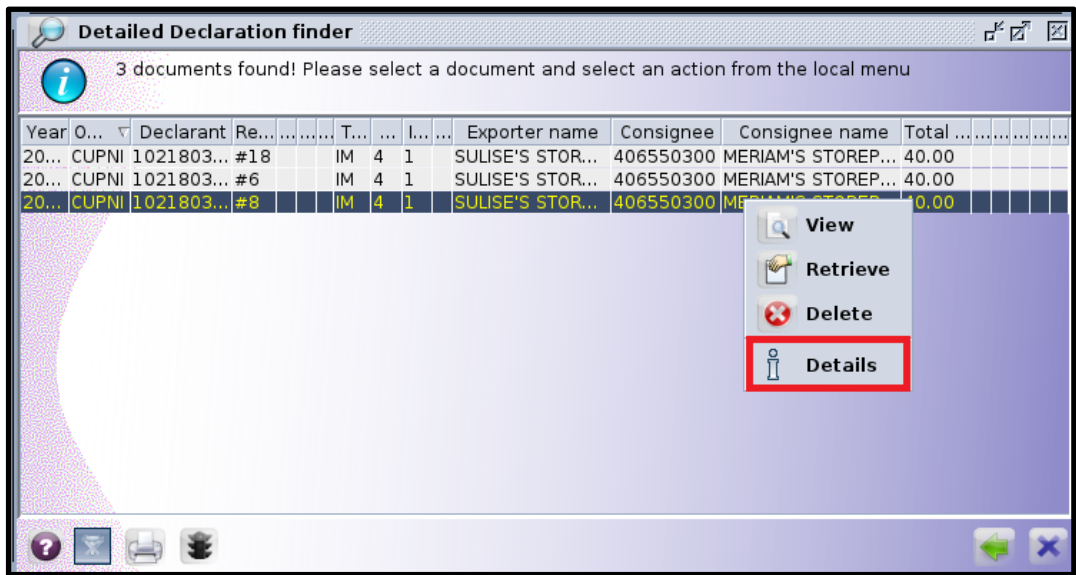

To find a declaration, right click on the Detailed Declaration e-document from the library and choose the find option.

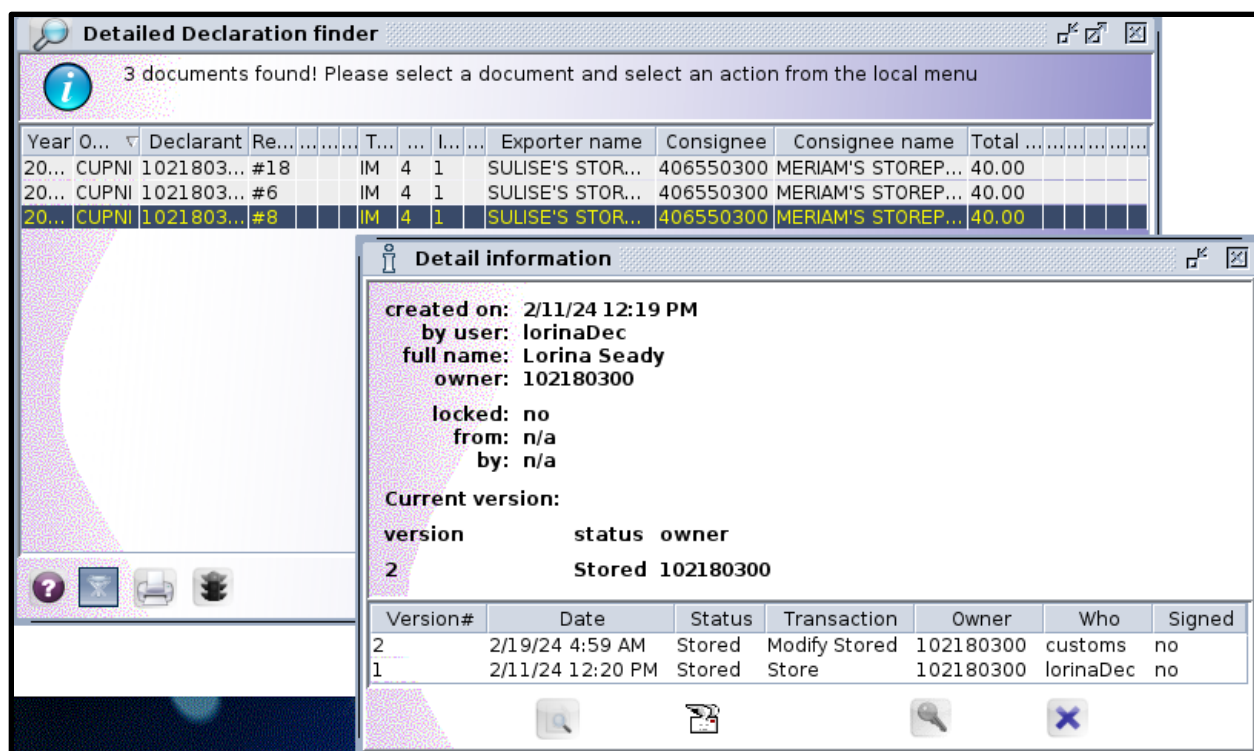

A window with search criteria will be opened and the user will use the appropriate criteria to find the needed information. Multiple search criteria can be combined to get the right line(s).

Then click the  icon. A list of all records matching the search criteria is displayed.

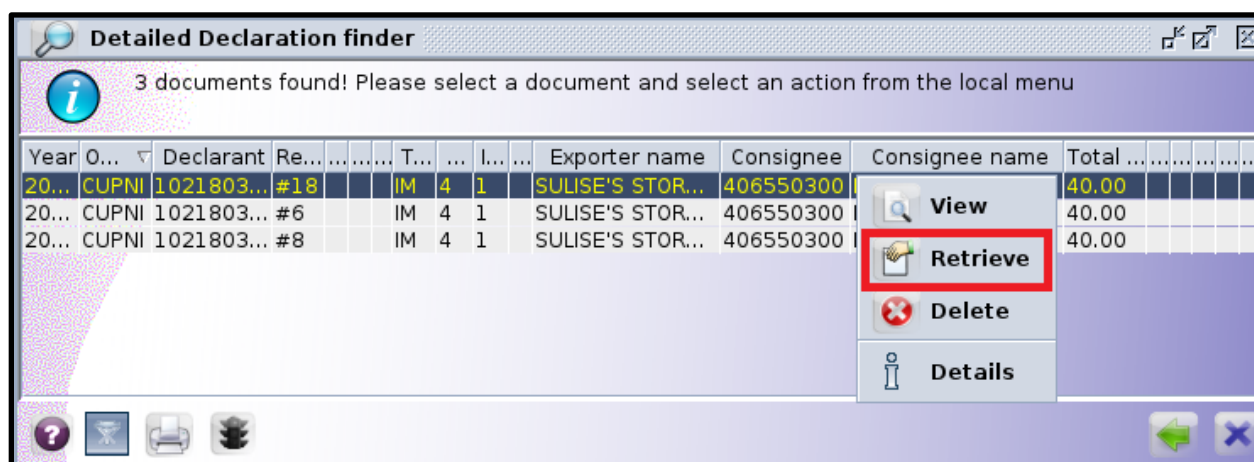

Details of the operations performed on the records can be viewed by clicking on the “Details” operation. The following screen will appear:

5. Retrieve a declaration

Right click on the declaration and choose "Retrieve" option.

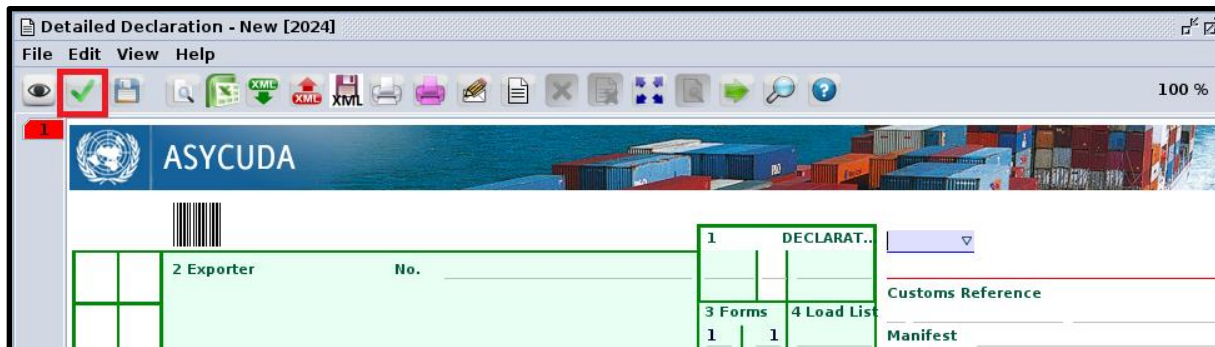

The declaration form will be displayed and when all the modifications are done, the user can store or validate the declaration.

6. Validate and assess a declaration

This operation corresponds to the submission of the declaration to the Customs and Tax Administration. **When the importer validates and assesses his declaration, he will no longer be able to retrieve it.**

To validate and assess the declaration, the importer will click on the  icon.
